-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I encompassing claims 12-18 and 28-45 in the reply filed on 06/27/2007 is acknowledged. Examiner notes that claims 31-45 were unintentionally omitted in the restriction requirement, but further notes that claims 31-45 fall into the elected group.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12-18, 28-41, and 43-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Barnett (U.S. 5,857,948). Barnett discloses a device comprising an elongated member capable of fitting around the neck of a user, a grasping mechanism on opposing ends of the elongated members for allowing an individual to grasp the elongated member as it is wrapped around a user's neck. Referring to claim 13, Barnett discloses teaches that the elongate member may be made of neoprene, which is resilient. Referring to claim 14, Barnett teaches the device may be inflated. Referring to claim 15, Barnett teaches that the inflatable elongated member includes a device to regulate inflation (fig. 6). Referring to claim 16, Barnett teaches 'finger holes' at the ends of the elongated member. Absent further limitation, with respect to claim 17,

Barnett teaches a device that can be moved in the claimed directions. Referring to claims 18, and 28-41 and 43-44, the claims are substantially similar in scope to the claims above. Note rejections above. Additionally, note that the device includes a top member, bottom member that are sealed together. Note the device is adapted to fit around the neck of a user, and that a user may grip the ends as they please. Note also that Barnett teaches a 'bulge' as the device has a reduced cross-section towards the ends of the device.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 42 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnett alone. With respect to claim 42, Barnett teaches the claimed invention except for a plurality of inflatable compartments. Having a plurality of inflatable compartments amounts to a duplication of working parts and therefore would have been prima facie obvious to one of ordinary skill in the art, as it is notoriously old and well known to have a plurality of inflatable compartments in inflatable devices. With respect to claim 45, Barnett teaches the claimed invention except for the specific shape. It would have been obvious to one of ordinary skill in the art to provide arcuate recesses in order to have the device better conform to the body of a user.
